DETAILED ACTION

Response to Amendment

Amendment, filed on June 12, 2003, has been entered and acknowledged by the examiner.

Claim Objections

Claim 15 is objected to because of the following informalities: In claim 15 line 5, the examiner suggests changing "pre-processcomposite" to - pre-process composite- . Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. 98/XThE10.

Regarding claim 14, Smith et al. disclose a material system of claim 1.

Where claim 1 states a method comprising: directing an energy beam (**page 3 line 3 laser annealing**) at a pre-processed composite material (**sampl s Z1, Z2 or Z3; page 2 line 12**) having a matrix containing a plurality of nanocrystals and a plurality of

traps (**page 2 line 18**) to reduce the size of the plurality of nanocrystals and the number of plurality of traps (**page 3 lines 1-10**) to produce a post-processed composite material.

As to limitation directing an energy beam to reduce the size of the plurality of nanocrystals in claim 14, it is the process step incorporated into which renders the claim as a product-by-process.

The courts have been holding that: “-In spite of the fact that a product-by-process claim may recite only process limitation, it is the product which is covered by the claim and not the recited process steps- - . (In re Hughes, 182 USPQ 106) - -“. Also - - Patentability of a claim to a product does not rest merely on a difference in the method by which that product is made. Rather, it is the product itself which must be new and unobvious. (In re Pilkington, 162 USPQ 147) - -.” Accordingly, “- - a rejection based on 35 U.S. C. section 102 or alternatively on 35 U.S. C. section 103 of the statute is eminently fair and acceptable.” (In re Brown and Saffer, 173 USPQ 685 and 688). - - The determination of the patentability of product-by-process claim is based on the product itself rather than on the process by which the product is made- -. In re Thrope, 777 F. 2d 695, 227 USPQ 964 (Fed. Cir. 1985).

As such, **no** patentable weight is given to process steps recited in claim 14.

Allowable Subject Matter

Claims 15-28 and 45-53 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 15, the following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggests a material system including the combination of all the limitations as set forth in claim 15, and specifically directing an energy beam at the pre-process composite material to reduce the size of the plurality of nanocrystals and to reduce the number of the plurality of traps to produce a post-process composite material capable of white light emission when fluoresced could not be found elsewhere in prior art.

Response to Arguments

Applicant's arguments filed on June 12, 2003 have been fully considered but they are not persuasive. The applicants assert that "to reduce the size of the plurality of nanocrystals" is not disclosed in Smith et al. The examiner notes that the particular claim of interest claim 14 is not a method of manufacturing claim but a product claim. Processes are not given patentable weight in product claims, and the particular limitation of concern communicated above is a process MPEP 2113.
